Black and white, with spot color.

This tutorial is to help you learn how to create a surreal effect like the one applied to this Picture.

1. First apply a Diffuse Glow Filter (Filter>Distort>Diffuse Glow) with the following settings:

        Graininess: 5
        Glow Amount: 8
        Clear Amount: 11

2. Then apply a New Levels Adjustment Layer (Layer>New Adjustment Layer>Levels) and pull in the left slider or shortened the color level range. How much is up to you.

3. This is the trickiest step, first create a new blank layer over the other layers.

4. Then take a paintbrush with a low opacity and <u>carefully</u> paint the rose pink on the new blank layer.
